OPEN TO CLASS COLLABORATIONS & INTERNSHIPS

Joella Edulan IT student.

IT student who builds small, working web projects with **Django**, **HTML**, **CSS** and **JavaScript**. Comfortable laying out responsive pages, styling them consistently and wiring them into a Django project. Works best on tasks with a clear goal that can be tested along the way.

PROJECTS BUILT	STILL STUDYING	LANGUAGES USED

02 Skills

- HTML & Semantics
- CSS & Responsive Layout
- Design & Typography
- Tools (Git, VS Code, Figma)
- Django
- JavaScript Basics

03 Work

01 WEB APP · DJANGO · UI DESIGN

Barangay Report System

Portal where residents file complaints and track case status, and admins manage records. Built the homepage and role-selection screen, set up the Django project with resident and admin views, and styled the dark theme.

02 BROWSER GAME · JAVASCRIPT · DOM

Monster Hunt: Love Beyond the Crown

Browser game with a title screen, start flow and a simple fight mechanic. Built the title screen layout and button interactions, and kept the game running inside a single HTML file.

03 LANDING PAGE · RESPONSIVE

Street Vendor Online Permit Registration

Landing page for an online permit service with a feature grid and clear login and sign-up calls to action. Built the feature cards and made the three-column layout stack cleanly on phones.

04 LANDING PAGE · LAYOUT

Buy, Sell, Trade: Local Marketplace

Community marketplace landing page with a split hero, feature strip and category grid. Built the hero and feature strip, and made the category cards wrap correctly on narrow screens.
